PR Maskin AS

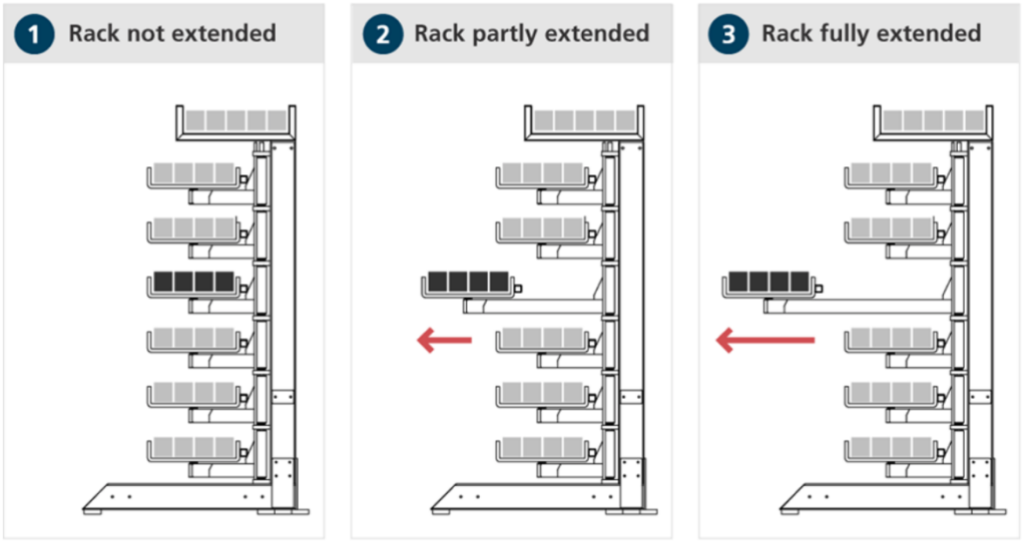

Prisliste materialreol med svingbare armer

Sving ut og last enkelt inn/ut

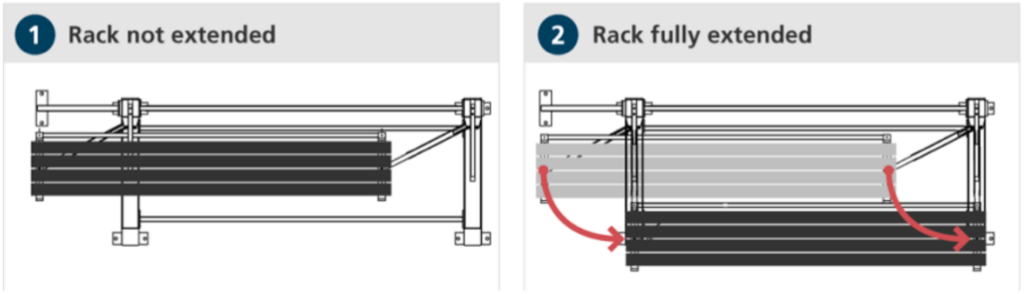

Lagring av stangmaterialer kan innebære problem som liten oversikt, fare for skade på materialet og er plasskrevende. Tradisjonelle materialstativer er utstyrt med faste armer, noe som kan gjøre inn/utlasting vanskelig og plasskrevende.

Vi kan tilby en løsning for å unngå de negative egenskapene ved tradisjonelle materialreoler. Lasting kan gjøres via kran takket være systemet der armene kan svinges ut. Lastestropper eller løftemagnet kan brukes til å ta materialet inn/ut fra armene og direkte til arbeidsområdet. Tynne materialer og korte biter kan lagres i en materialskuff.

Dette er ikke bare svært effektivt, men øker sikkerheten betydelig og tar liten plass.
