

MADE IN GERMANY

WIRELESS REMOTE CONTROL

RC mini

The RC mini is a state-of-the-art wireless remote control designed for seamless operation with the BasicPlus orbital welding system. Featuring a modular construction, it offers intuitive, smartphone-style navigation and automated welding program generation. The user-friendly software provides extensive customization options, enabling operators to create and load welding programs remotely while documenting welding parameters with ease.

The system is highly adaptable, allowing operators to tailor settings to their specific needs. Clear and subtle notifications ensure smooth communication with the machine, while key functions and information are easily accessible from the home screen.

Data transmission between the RC mini and the welding machine is powered by Bluetooth Class 1, ensuring a reliable, long-range connection. The rechargeable battery pack supports full-day operation, and the device is conveniently recharged in its dedicated charging dock after use.

Compatible with the CompactDual/TwoInOne power sources.

SCOPE OF DELIVERY

The **RC mini** comes with side pockets and a convenient carrying handle for easy transport. It includes a high-quality suitcase with custom foam inserts for secure storage, as well as a charging dock. The set is completed with a wall power supply (100-240 VAC) for reliable charging.

TECHNICAL DATA

- Power supply: 100-240 VAC, 50/60 Hz
- Charging voltage: 27-33 VDC / 0,9 A
- Internal battery: 18 V DC
- Range: 100m (open field); reduced in complex environments
- Dimensions L x W x H: 85 x 355 x 205 mm / 3.35 x 13.98 x 8.07 in
- Weight: 1,9 kg / 4.19 lbs
- Communication (documentation, update, printer, analyzer): 1 x USB port
