Our Goal:

Work environments,
that think ahead,
that grow with you,
that create added value..

UPGRADE YOUR FACTORY

With SIM-TEC Solutions you choose more than just high-quality workshop equipment. You invest in more efficient processes, structured workstations and maximum order in production. Our systems help to reduce search times, simplify changeover processes and establish standards in the work environment.

Whether production, assembly or maintenance – we provide the solution that allows you to make your work environment simple, secure and future-proof.

VISION

We create structure. For greater efficiency.

Our vision is to support companies of all sizes in optimizing their daily workflows through intelligent organization systems.

We know: order is not an end in itself – it is a competitive advantage. With SIM-TEC you make the leap from improvised tool storage to a well-designed, scalable and high-performance workstation system.

SIM-TEC SOLUTIONS

We are a dynamic company with an industrial background and a clear focus:
Maximum order and functionality at the workplace with our Storage Kings.

What sets us apart:

- ✓ In-house development & manufacturing in Germany
- ✓ Robust, long-lasting systems with at least 900 kg load capacity per pull-out
- ✓ Custom configuration for every application area
- ✓ Flexibility down to the last detail: reconfigurable without disassembly
- ✓ In-house powder coating

Our products are the result of experience, practical relevance and the ambition to make every detail better.
 Whether cabinet, workstation or special cart – with SIM-TEC you choose reliability, clarity and efficiency.

OVERVIEW

STS-WS Workshop Storage / Cabinet

- ✓ Full-extension drawers with at least 900 kg load capacity each
- ✓ Operable from both sides, fork pockets for transport
- ✓ Many additional advantages

Pull-out widths

←→
 200 mm | 300 mm | 400 mm
 also available as Mixed combinations

Available in 3 heights

↑↓
 1290 mm
 1690 mm
 2090 mm

Available in 3 depths

i Compact & niche-friendly

How to read the cabinet designations

Our cabinets follow a uniform, easy-to-understand labeling system: Each designation consists of cabinet type, depth, number of drawers and pull-out width.

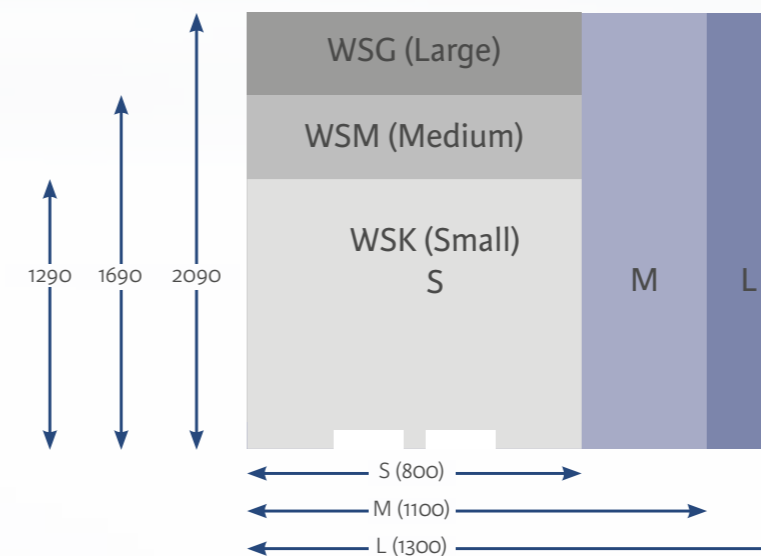

[Type] – [Depth] – [Number of drawers] – [Width of the drawers]

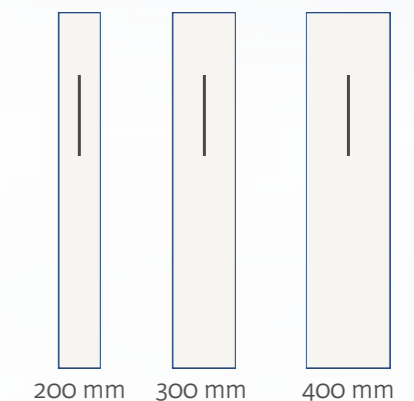

WSM-M-2-2

Workshop Storage Medium - Medium depth (1100 mm) - 2 drawers - 200 mm pull-out width

Section	Meaning
Type	WS-G (Large) (Height: 2090 mm) WS-M (Medium) (Height: 1690 mm) WS-K (Small) (Height: 1290 mm)
Depths	S = 800 mm M = 1100 mm L = 1300 mm
Number of drawers	Total number of drawers
Width of the drawers	2 = pull-out width 200mm 3 = pull-out width 300 mm 4 = pull-out width 400 mm MX = Mixed-pull-out width (e.g. 3×200 mm + 1×300 mm)

Width of the drawers

STS-WS - 200mm drawers

Our cabinets with a 200 mm pull-out width offer a high level of clarity with minimal space requirements. Ideal for the structured storage of tools for bending, turning and milling and punching as well as other operating resources.

	Robust construction made of powder-coated 3 mm sheet steel
	Drawers are lockable
	Variable mounting of tool holders through a 12,5 mm grid
	Side fork pockets for quick and easy relocation
	Enhanced occupational safety through direct, two-sided access to the tools
	Highest load capacity and safety through support wheels
	Stainless steel handle
	900 kg load capacity per pull-out

Possible equipment variants

Bending	Euro boxes	Storage bins
Storage tray	Perforated panel	Punching
Bulk material tray	Turning and milling

STS-WS - 300 mm drawers

More volume. Best overview. Maximum flexibility.

The STS WS cabinets with a 300 mm pull-out width are the optimal solution for medium-sized tools, assortment cases, spare-part kits or measuring instruments. They offer more storage space per level than 200 mm systems, yet remain clear and ergonomically accessible.

WSM-M-3-3

	Robust construction made of powder-coated 3 mm sheet steel
	Drawers are lockable
	Variable mounting of tool holders through a 12,5 mm grid

STS-WS - 400 mm drawers

Maximum volume. For large tools, bulk material trays and more.

Our STS WS cabinets with a 400 mm pull-out width are the right choice when maximum storage space per pull-out is required. They offer the highest load capacity and are particularly suitable for storage fixtures, heavy components or extensive equipment sets.

WSM-M-2-4

	Robust construction made of powder-coated 3 mm sheet steel

STS-WS - Mixed drawers

Flexibility meets function

Not every tool fits into a standard grid – that’s why our mixed pull-out cabinets offer a flexible solution for workshops with diverse requirements. By combining different pull-out widths within a single cabinet, even complex tool assortments can be stored in a structured and space-saving manner.

Our mixed cabinets can be precisely aligned with your production processes – whether in turning and milling, bending, punching, or for storing operating supplies and setup cassettes.

Popular cabinet configurations from practical use

Guidance through experience

Whether in production, assembly or maintenance – in numerous projects our customers repeatedly opt for certain cabinet configurations. These variants have proven themselves in everyday use and provide good guidance when it comes to making an initial selection. The following examples show common combinations of pull-out width, depth and height, as they are successfully used in a wide variety of industries and applications.

WSM-M-3-2 S

	Robust construction made of powder-coated 3 mm sheet steel
	Drawers are lockable
	Variable mounting of tool holders through a 12,5 mm grid
	Side fork pockets for quick and easy relocation
	Enhanced occupational safety through direct, two-sided access to the tools

STS-ABS - ASSEMBLY & BENCH STATION

Structure. Overview. Access – exactly where you need it.

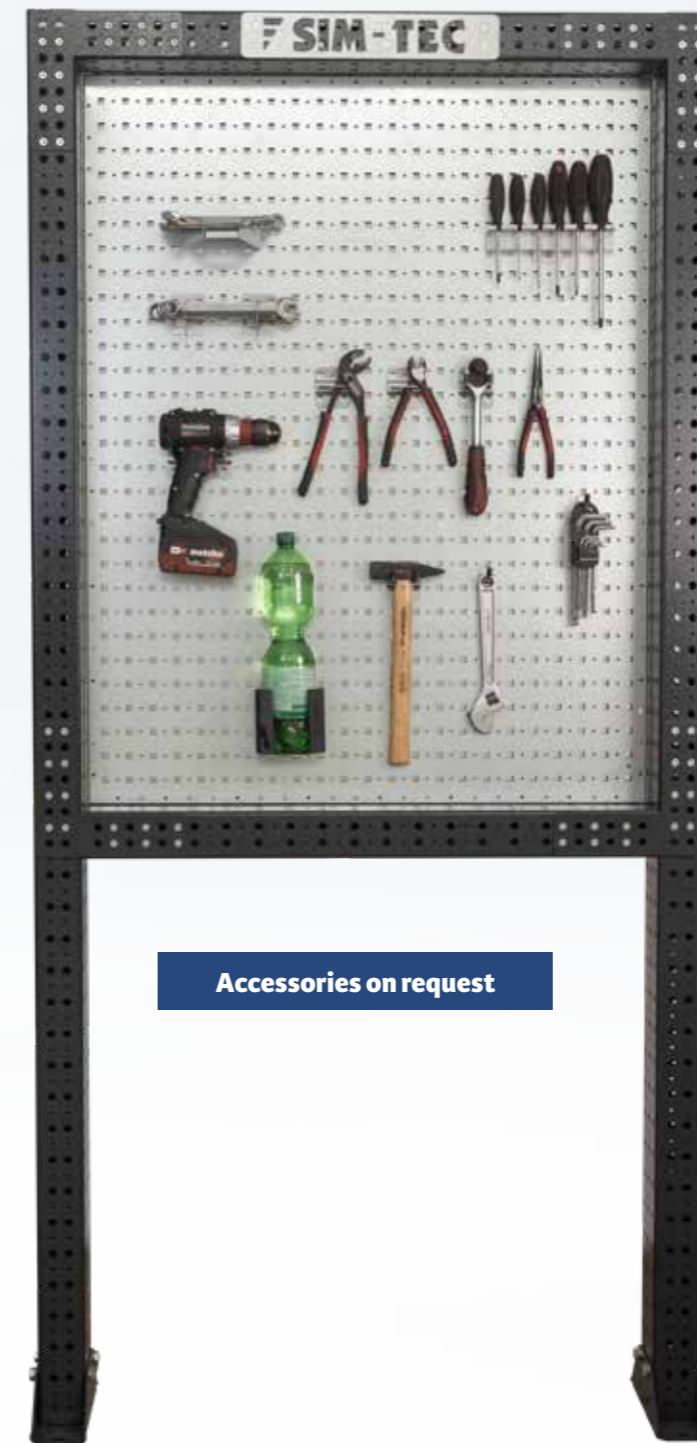

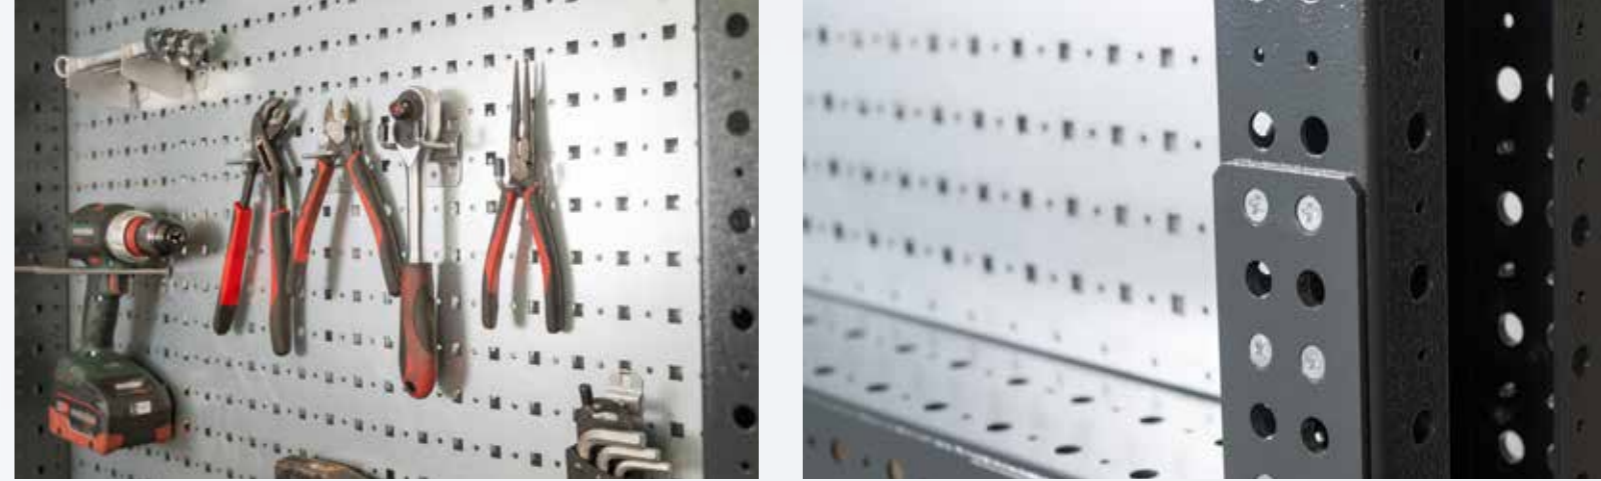

The STS ABS Assembly & Bench Stations from SIM-TEC create a central, organized workstation for tools, fixtures and aids. They are designed as a free-standing solution, can be equipped flexibly and integrate seamlessly into existing production or assembly processes.

Thanks to the well thought-out design with perforated panel, ergonomic height and intelligent accessory system, each station becomes an efficient, individually adaptable workstation.

Product features at a glance

- ✔ Usable from both sides - maximum space utilization
- ✔ Quickly accessible tool arrangement – no searching, no overreaching
- ✔ Fully modular – accessories adjustable without tools
- ✔ Clear perforated panel solution – ideal for visual order
- ✔ Accessories on request – among others, hooks, holders, tool carriers etc.
- ✔ Square perforation of 10x10 mm as well as a round perforation of 5 mm
- ✔ Optional with worktop and locking flap available

Available widths

STS-LGW - LONG-GOODS WAGON

Secure transport. Structured storage. Direct access.

The STS LGW long-goods wagon from SIM-TEC is the well-thought-out solution for the storage and in-plant transport of long materials. Whether pipes, profiles, rails, strips or bars – with the LGW everything remains clearly arranged, protected and available at all times.

Thanks to its sturdy construction, compact format and smooth-running casters, the cart can be maneuvered effortlessly even in confined production areas – without any industrial truck.

Product features at a glance

- ✓ Designed for standard long materials up to 4 m
- ✓ Load capacity up to 3000kg
- ✓ Steel frame with powder coating – robust and durable
- ✓ 4 industrial casters, 2 with locks (optional additional heavy-duty casters, e.g. centered, possible)
- ✓ Easy handling without crane or forklift
- ✓ Structured storage prevents damage
- ✓ Available with stainless steel or plastic handles on request
- ✓ Robust design for daily workshop use
