STX - The Lifting Magnet for Forklifts

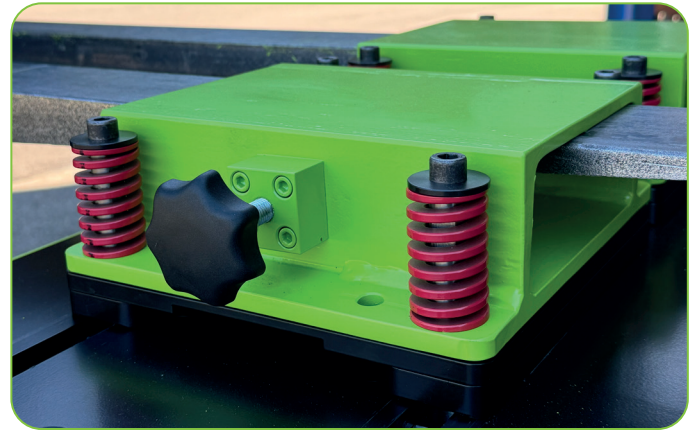

With STX forklift lifting magnets, steel parts can be picked up and transported quickly, safely and without any additional installation effort. The system, developed specifically for forklifts, allows for convenient operation directly from the driver's seat.

- Operation without getting off the forklift
- Easy Loading with the Forklift
- Control via tine adjustment - no additional connections required

SAFE TRANSPORT

- Spring-loaded suspension compensates for vibrations
- A safety mechanism prevents the system from demag when a load is lifted

EFFICIENT STEEL HANDLING

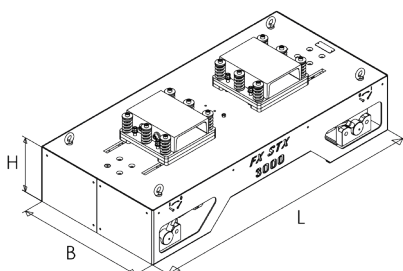

- Adjustable holding force allows for the individual lifting of sheet metal

§ European patent application filed

FULL FLEXIBILITY

- STX 1500 kg
for loads up to 1.500 kg
- STX 3000 kg
for loads up to 3.000 kg
- STX GRM
Model for stage cleaning
